## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention: 1) A method of producing an implant of comprising either formula I, II or IV wherein  $x$  = formula VI, claims 52-69, 78-92

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 39-51, 70-77 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

A telephone call was made to Jennifer R. Leach on 07/07/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
